About Us & Our Principles

A. ABOUT US

PT. MOSHA SINALSAL SOLUSI (MSS) was established on November 2021 with main business in Plant Commissioning, Automation system, Power Plant, Oil & Gas, Sustainability, Renewable Energy, Solar Power, Marine, Training and Manpower Supply.

We provide turnkey system solution from Idea/Concept, Engineering, Installation, Commissioning, Startup and Operation/Maintenance in Automation System and Plant (Oil Gas, Power & Chemical Plant, Marine).

Our System solution appropriate with customer's requirement, we will always ensure the customer concept and idea can be transformed into a high quality and profitable product through our technical expertise and experience.

MSS has an excellent skill and experienced man power to provide high quality product and service which is at the end will give productivity and profit to our customer

Our strategic partnership with all stakeholder, Customer, Supplier, Vendor and Principle is the key success for our business growth

- ***Our Vision***

"Become a leading consultancy, training and supply company in Commissioning, Automation, Energy and Manpower Supply to support costumer growth"

- ***Our Mision***

"Provide and build good quality and value in every jobs scope with the professional and skillfull manpower"

- ***Commitment***

MSS has Standard Operational Procedure (SOP) to execute every project line with fully commitment in control, quality, safety, health, environment, and job safety analysis before the implementation.

We will provide a multi discipline team with expertise in each of the critical areas to the success of project goal.

Customer satisfaction is our top priority through a consistent high quality product/service, in time project delivery and meeting project cost/budget

About Us & Our Principles

MSS is planned to compete in order to have exclusive contract with the new customer in our scope job service. To meet with the customer expectation, we always has an excellent quality and performance, by having and preparing the high competence level of engineer and technician teams. The strategy of MSS will use the standard procedure and policy to make a successfull project

Quality :

- Make sure the workmanship is capable to do the System Integration, Engineering, Installation, Commissioning, Operation & Maintenance
- Make sure all materials will be installed completely and good condition as detail specification needed.
- Prepare all the tools and measurement to meet the standard installation and procedure.
- Checking the installation work properly base on the customer requirement & Specification.

Safety :

- Work procedure and method statement must be in place as a guidance of working safely
- All equipment and tool are in good condition and safe to be used
- High awareness and encourage everyone to speak out about safety

Healthy :

- Make sure the first aid measures are available.
- Make sure all the manpower in fit and healthy condition.

Environment :

- Agrees and supports energy saving program by prioritizing the use of energy saver or green technology.
- All the excess materials should be cleaned up from the environment and throw it to the basket when finishing the installation.
- Calculate all material installation for efficiency

Organization Management

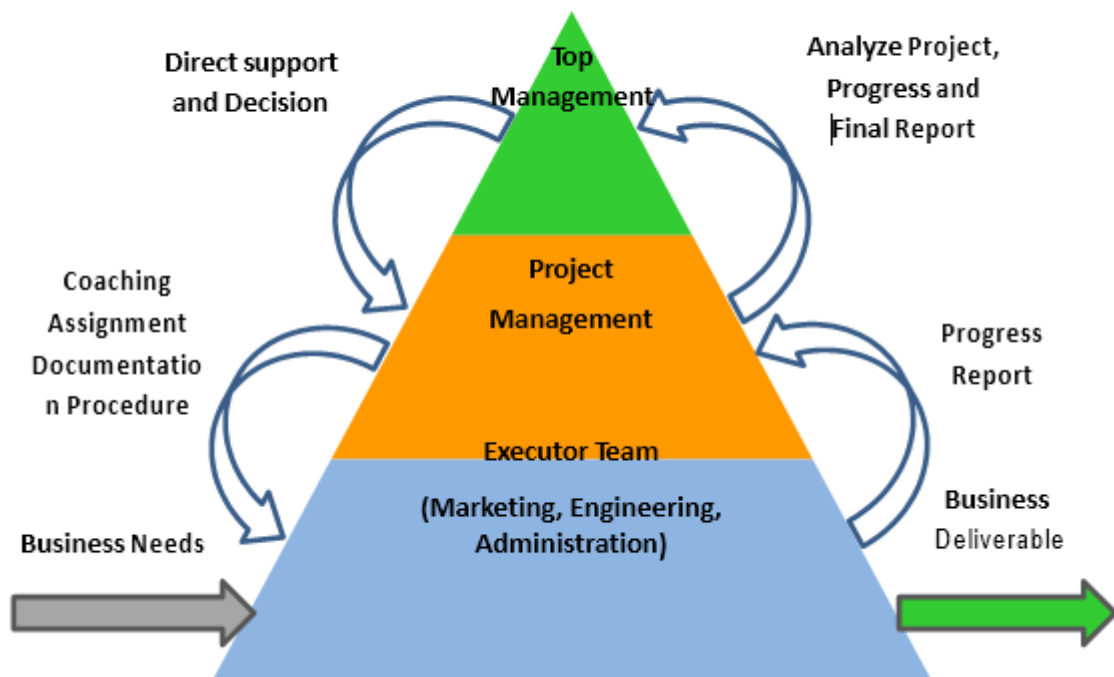

B. ORGANIZATION STRUCTURE

The way of MSS manage the organization is to have cross functional teams in a functional organization whereas the project manager will have responsibility matrix between executing level and top management level. Project manager has ownership responsibility for delivery of project benefit and functionality.

The intention of MSS model is to have slim and efficient organization in term of cutting cost within small headcount.

The management model are having three core which are:

1. Top management
2. Project management
3. Executing Team

Organization Management

Top Management :

MSS top management make strategic decisions, business development, provide new business and the products.

The top management is to identify risks and some of project issues. The top management will therefore receive consolidated final report from project management

Project Management :

Project management of MSS is the area of project manager to provide framework on which the project manager can rely in terms of process and control.

The project manager is a formal, centralized layer of control between top management and executing team. It is used for project that have critical impact on business operations or that have a large number of dependencies.

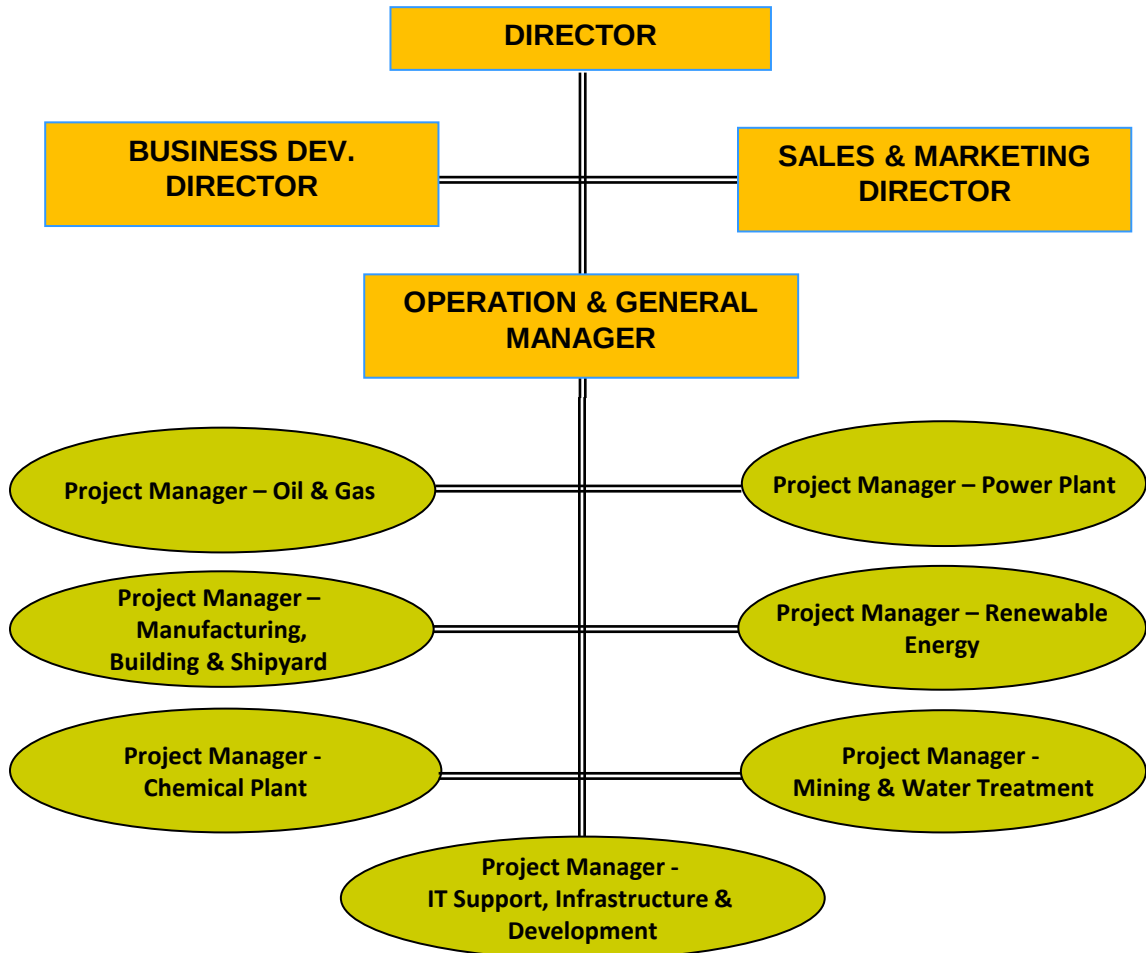

Project management also can be exposure to multiple projects with multi-skills support from executor team and also can be used to facilitate knowledge transfer, so that the training is conducted to have internal trainers.

Execution Team :

MSS will provide a multi-discipline engineers and technicians with expertise in each of the areas critical as executor team. This also applied as responsibility matrix to have slim and efficient organization and reduce operational expenses

Organization Management

Organization Chart

Each project is leaded by a Project Manager and supported by project team which consist of (depend on the project requirement):

- Engineering
- Quality
- Construction
- Commissioning
- Planner/Scheduler
- Procurement
- HSE

C. PROJECT SERVICES

Our main business is to provide consultancy and service in plant commissioning, automation system, energy and professional manpower supply.

Our Project Service covers various segment of industry as below:

- Oil & Gas
- Power Plant & Solar Power Plant
- Renewable Energy & Sustainability
- Marine/Shipyard
- Smelter, Chemical Plant
- Water Treatment
- Manufacturing Plant
- Mining
- Processing Plant
- Building, Office

Our Product & Service are included:

- Engineering & Design, Installation, QC Inspection, Commissioning
- Repair, Improvement, Modification and Maintenance
- Supply Manpower, Material and Equipment (Control Panel, Sensor/Transmitter/Detector, Commissioning Tools, Measurement & Calibration Equipment, etc.)

Our project team is capable to provide analysis to our client to determine which kind of Automation system will be the best to be implemented to meet their system requirement in term of technical specification, reliability, quality and cost/budget

Project Services

For each of those industrial segment you can rely on us to support your company growth on below service and supply:

Consultant

- Plant Commissioning (Power Plant, Oil & Gas, Chemical Plant, Marine, Water Treatment, etc)
- Renewable Energy, Sustainability & Solar Power Plant
- Automation System, Electrical & Instrumentation
- Software & System Development

Training

- Commissioning, QA/QC, Engineering, Solar PV, Homer Pro, Carbon Accounting
- Automation, PLC, Drafter, Etc
- Safety, Continuous Improvement, Management

Manpower Supply

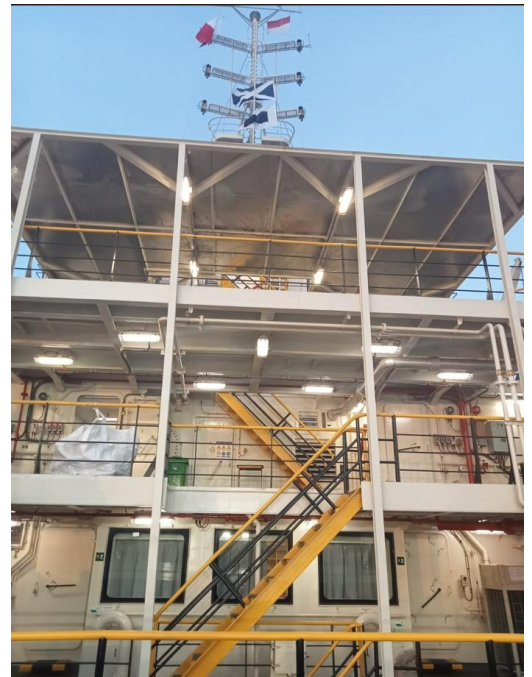

- Engineering, Construction, QA/QC, Commissioning, Operation & Maintenance
- Staff & Operator for Manufacturing Plant

Project Experiences

D. PROJECT EXPERIENCES

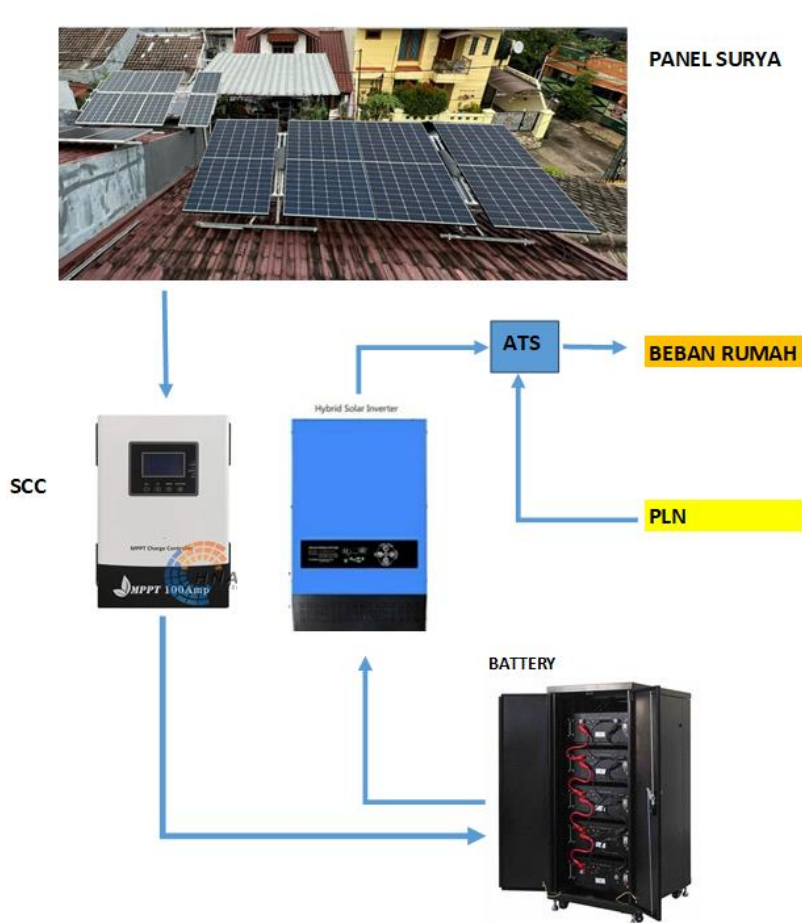

Electrical & Instrument Construction, Inspection and Commissioning in
ASL Shipyard Pte Ltd Batam

Client: Asia Hazsafe Technical Services (AHTS) Pte Ltd Singapore/Australia
Year 2023 - 2024

Project Experiences

Design and Construction Solar PV in Bekasi, West Java Year 2024

Project Experiences

Electrical & Civil construction, Inspection and Commissioning in Asiafast Marine Industries, Batam

Client: Asianfast/Batamfast Singapore/Batam

Year 2023

Project Experiences

Construction and Commissioning Pembangkit Listrik Mesin Gas (PLTMG) Portsite Dual Fuel Power Plant - P20014, Papua, 140 MW.

Client: PT Freeport Indonesia

Year 2022

Project Experiences

Electrical & Instrument QC Inspection and Commissioning Vessel/Ship Building at PT. Kim Seah Shipyard Indonesia – Batam
Client: HAZTECH Solutions - Birdon Pty Ltd Australia
Year 2021-2022

Project Experiences

Construction and Commissioning Geothermal Power Plant in Rantau Dedap Sumatera Selatan, 2 x 49,2 MW.

Client: Supreme Energy

Tahun 2021

Project Experiences

Consultant Manpower Supply for all Commissioning Discipline (Mechanical, Electrical, Instrument, Automation, Process, Chemist, HSE, Operation) at JAWA-1 CCPP, PLTGU 1760 MW Project, Cilamaya, Karawang, West Java.

Client: Samsung C&T Corporation

Tahun 2020 - 2021

Project Experiences

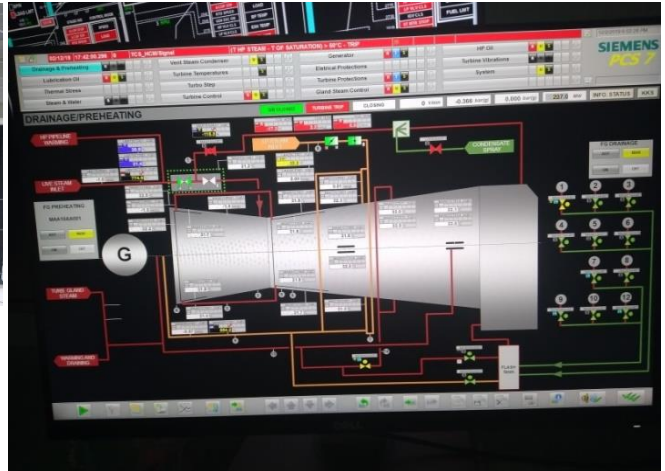

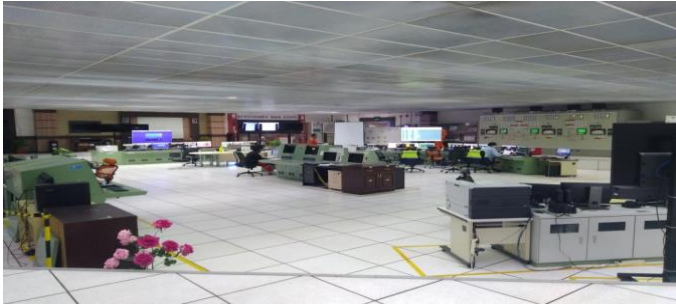

Electrical, Instrument & Control Commissioning Condensate & Regeneration Plant in Tanjung Jati B Expansion, Coal Fired Steam Power Plant 2 x 1,000MW

Client: Boustead Salcon Water Solution – Toshiba Asia Pacific
Year 2020

Project Experiences

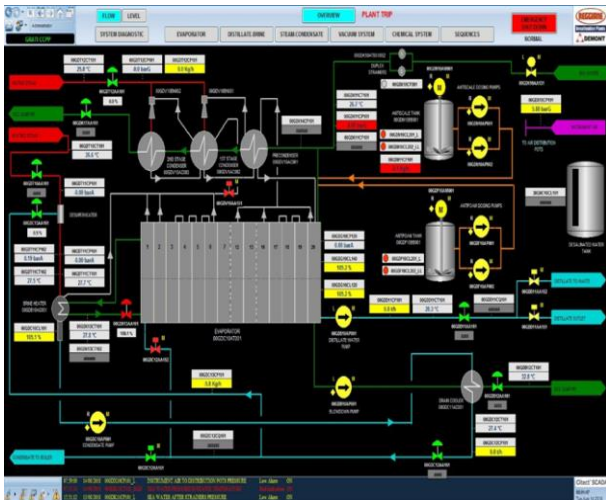

Instrument Control & DCS System Commissioning Add On Grati Block 2
Project 150 MW, Pasuruan – East Java
Client: Doosan Heavy Industries, KOREA
Year 2020

Project Experiences

WATER & OIL TREATMENT System in Power Plant Project, Grati , Pasuruan
– East Java.

Client: Lotte Engineering & Constructor, KOREA
Year 2019

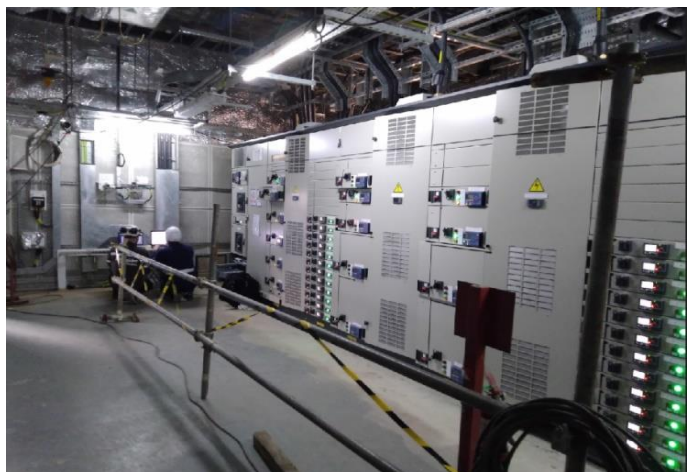

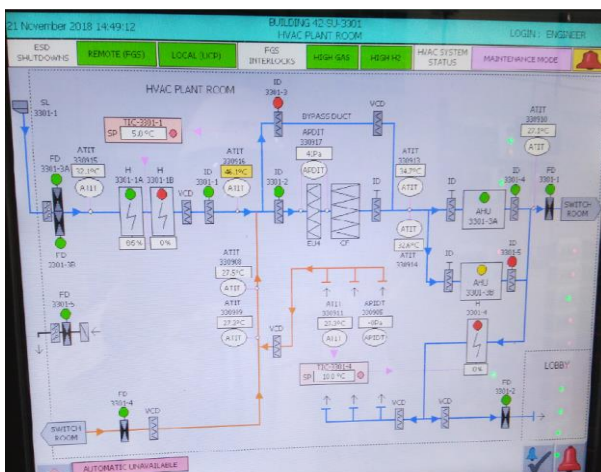

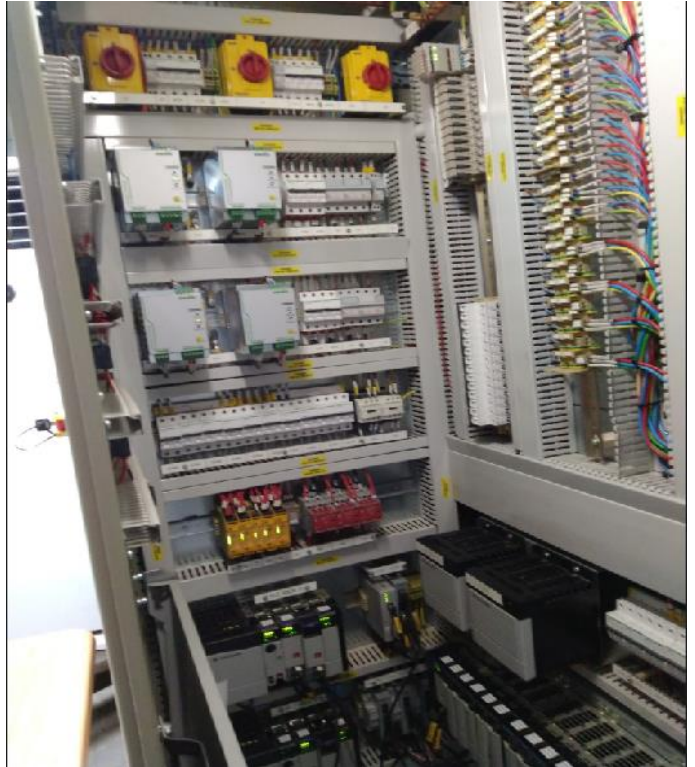

Project Experiences

Commissioning Electrical, Instrument & Automation of HVAC SYSTEM in
Schneider Electric France - TCO Project, in Wasco Batam Yard

Client: Schneider Electric France

Year 2018

Project Experiences

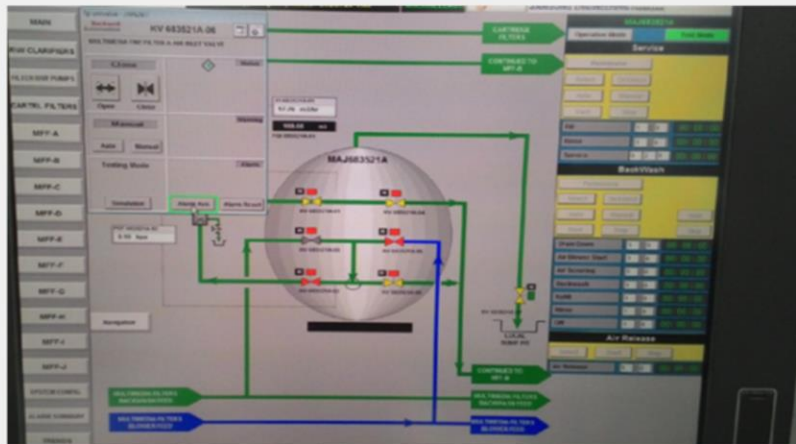

**DCS Emerson Ovation Control System
(Ulubelu – Geothermal Lampung Project)**

Client: Pertamina Geothermal Energy. Year 2017

Project Experiences

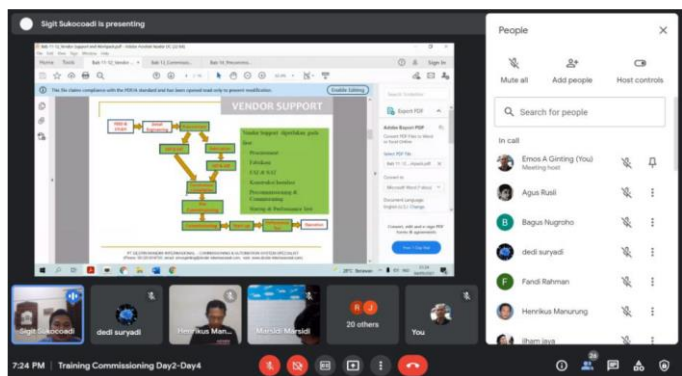

PLC Allen Bradley & Factory Talk View HMI in Water System Clarifier & Multimedia Fine Filter in EPC1 – Cepu Bojonegoro Project

Project Experiences

Conduct Online and Offline Training, Speaker in some Webinar:

- Energy transition and renewable energy
- Commissioning
- PLC & Automation System
- Electrical & Instrument

E. STRATEGY & BUSINESS PARTNER

Growth Strategies

- Expand markets and services
- Expand fabrication area to Medan and Sumatra Indonesia
- improve technical manpower

Customer

Below are the list of Mosha Sinalsal Solusi customer.

Our Business Partner:

PT Kiat Global Batam (Offshore Technology Institute), Caleb Engineering, HollySys Automation Technologies, Daehan Sensor Co., Ltd (Korea), Zener (Fire & Gas System - Equipment), Mokveld Valve System, PT. MasterCal Indonesia, PT. Metamor Solution, PT. Malvindo Harmoni Pratama, PT. Air Energy, PT. Kwarsa Hexagon, XIAMEN Haiwell Technology Co. Ltd., PT. Tripilar Cipta Inovasi, PT. Transavia Otomasi Pratama, Present Group Singapore, PT Edmar Teknologi Indonesia, PT Galang Solusi Teknik, PT. Kim Seah Shipyard/Penguin Shipyard Asia Pte Ltd - Singapore, Lotte Engineering & Constructor, PT Kartanegara Energi Perkasa, Boustead Salcon Water Solutions, Haztech Solutions, Birdon Pty, Ltd, Samsung C&T Corporation, ASL Shipyard, SeaSwift, AHTS Singapore/Australia, SLV Metropolitan, Wartsila, Asianfast Marine, PT Suzuki Indomobil Motor, BBSPJIHPMM – Kementerian Perindustrian RI, PT Moya Indonesia, PT Harmoni Berkas Mulia Teknik, PT Danfoss Indonesia, PT Jasa Tirta Energi, Zonaebt, PT Swagelok Indonesia, etc.
